

Health Program for Juvenile Gouldians, Finches & Canaries

This program protects juvenile Gouldians, as well as other juvenile finches and Canaries, during their most vulnerable time of life and especially during the cold winters. Our **Health Program** starts when the youngsters are moved away from their parents.

Day of Week	Water Supplements	Food Supplements	Health Information
Monday	Quik-Gel/Megamix	Dry Seed Mix	Quik-Gel/Megamix (2mls/liter) helps protect the juveniles from stress related diseases.
Tuesday	Fresh Water	TurboBooster, Quik-Gel E Powder, F-Vite Inca Honey	Air Sac Mites, Lice, Tapeworms & Coccidiosis Treatments are administered in a weekly rotation schedule each month. S76 is rotated with Worm Away & Cocci-Care in the drinking water for 2 consecutive days over 3 weeks
Wednesday	Fresh Water	Dry Seed Mix	
Thursday	Fresh Water	TurboBooster, Quik-Gel E powder, F-Vite & Inca Honey	
Friday	KD ¹	Dry Seed Mix	KD Bath Weekly ¹ KD ¼ tsp/liter of drinking water to maintain normal gut pH. ² Dufoplus (2.5ml), Ioford (5ml) and Megamix (2ml) are mixed into 1 liter of drinking water. They provide the vitamins and trace elements needed to produce robust young.
Saturday	Dufoplus & Ioford ²	TurboBooster, Quik-Gel E powder & F-Vite & Inca Honey	
Sunday	Ioford & Megamix ²	TurboBooster, Quik-Gel E Powder & -F-Vite ³	

Options for Food Supplements

[TurboBooster](#), [E Powder](#) and [F-Vite](#) should be provided as scheduled above and may be mixed with dry seed or provided in a soft food mix. To prevent disease [S76](#), [Cocci-Care](#) and [Worm Away](#) are administered on a weekly rotation schedule each month. [Megamix](#) must be used daily when the drinking water pH is over 7 to help prevent [Thrush](#), [Ecoli](#) and other intestinal infections. [Quik-Gel](#) should be added to the drinking water during cold or inclement weather and whenever the juveniles show signs of lethargy. Mix [Ioford](#)- minerals and [Dufoplus](#)- vitamins according to [instructions](#).

Dry Seed Ingredient Mix Rate: [TurboBooster](#) (5ml), 3 drops each of [Quik-Gel](#) and [Inca Honey](#) are thoroughly mixed into 500 grams of seed. Then ½ level teaspoon (2.5 grams) each of [E Powder](#), and [F-Vite](#) are mixed through the seed mix. Seed mix may be left in the cage for 2 days when temperatures are below 72° F (24° C).

Alan Simpson's World Famous Soft Food Recipe: 1 cup (250 grams) [Miracle Meal](#), 1 hardboiled egg, 1 tablespoon [TurboBooster](#), 2 tablespoons [E Powder](#), 1 tablespoon [F-Vite](#), 3 drops [Quik-Gel](#) & 3 drops [Inca Honey](#) (when indicated).

Procedure: Dissolve [Quik-Gel](#) into a small amount (10mls) of warm water. Thoroughly mix [TurboBooster](#) with [Quik-Gel](#) and [Inca Honey](#) solution into [Miracle Meal](#). Store in refrigerator overnight. In the morning mix in the [E Powder](#) followed by the [F-Vite](#). Finally fold the crushed boiled egg through the mixture. Remove any uneaten portions within 6 hours during hot weather.
